Source: Commonwealth Fund Scorecard on State Health System Performance, 2015.

Note: States are ranked 1 to 50, where 1 is best and 50 is worst.

The Commonwealth Fund's Scorecard on State Health System Performance, 2015 Edition, evaluates 42 key indicators grouped into five dimensions:

Access and Affordability (six indicators): includes rates of insurance coverage for children and adults, as well as individuals' out-of-pocket expenses for medical care and cost-related barriers to receiving care. **Prevention and Treatment** (16 indicators): includes measures of receiving preventive care and the quality of care in ambulatory, hospital, and long-term care and post-acute settings. **Potentially Avoidable Hospital Use and Cost** (nine indicators): includes indicators of hospital use that might have been reduced with timely and effective care management and follow-up care, as well as estimates of per-person spending among Medicare beneficiaries and the cost of employer-sponsored insurance. One indicator, hospital admissions for ambulatory care-sensitive conditions, reported separately for two distinct age groups. **Healthy Lives** (11 indicators): includes indicators that measure premature death and health risk behaviors. **Equity**: The scorecard evaluates differences in performance on 33 equity indicators associated with patients' income level (18 indicators) or race or ethnicity (15 indicators) that span the other four dimensions of performance. The data available for some equity indicators, such as childhood vaccinations, may represent a different time point from that used in the corresponding main scorecard indicator. For each state, health system performance on each equity indicator as it pertains to low-income populations (under 200% of the federal poverty level) and racial or ethnic minority groups (black or other race or Hispanic ethnicity) is compared with the national average. The resulting difference in performance is the "equity gap," which forms the basis of our state rankings for this dimension. To support more comprehensive assessment of disparities, the 2015 scorecard expanded the number of indicators evaluated in the equity dimension; hence, the 2015 equity rankings are not strictly comparable to earlier scorecards.

Summerlin Hospital Medical Center	Las Vegas, NV	43
Sunrise Hospital and Medical Center	Las Vegas, NV	33
University Medical Center	Las Vegas, NV	28
Valley Hospital Medical Center	Las Vegas, NV	45

Source: Consumer Reports Health 2016. **Notes:** The Safety Score is a composite of five key measures of patient safety: avoiding infections, avoiding readmissions, communicating about medications and discharge, appropriate use of chest and abdominal scanning, and avoiding mortality (medical and surgical). The score is expressed on 100-point scale. A hospital would score a 100 if it earned the highest possible score in all measures and would score 1 if it earned the lowest scores in all measures. Each of the five domains is weighted equally. Each is worth 20 points out of 100.

Healthcare Overview

A Las Vegas HEALS PERSPECTIVE

DOUGLAS GEIZNER
CEO

What is on the horizon for Las Vegas healthcare?

Las Vegas is on its journey to becoming the most recognized destination for Global Health & Wellness Travel, a *Medical Tourism Destination*. Several months back Las Vegas HEALS, Las Vegas Convention & Visitors Authority (LVCVA), Las Vegas Global Economic Alliance (LVGEA) and the UNLV College of Hotel Administration developed a regional strategic plan, identifying a set of key growth opportunities and recommendations. These planned initiatives for the industry & regional growth are perfectly aligned to develop Las Vegas as a *Regional Center of Excellence*.

Soon to be home to three medical schools, including the new *UNLV School of Medicine*, *Roseman University College of Medicine* and *Touro University School of Medicine*; Southern Nevada will attract a variety of industry participants. Within the initiatives attracting faculty for the Graduate Medical Education expansion is well underway with *new physician residency, fellowship, nursing and specialty programs* designed to empower future graduates of our medical schools. These programs will play an integral role in growing a physician workforce to not only cater to the

local market but to also attract global demand of medical and wellness travelers.

The Las Vegas Medical District (LVMD), containing two teaching hospitals (University Medical Center and Valley Hospital Medical Center) will become the future home of the UNLV School of Medicine. Meanwhile, in the City of Henderson the vision of East Side Medical Corridor has progressed by the development of the new Henderson Hospital. Union Village, Henderson Medical Plaza, Gateway Masterplan, Dignity Health's ambulatory facility are all part of that vision.

The new and current infrastructure is essential in helping align our physicians, nurses, allied health professionals and ancillary businesses to participate in creating an Integrated Health Care Delivery environment in Southern Nevada.

Nevada, and especially Las Vegas, has identified Healthcare as a top priority and is executing an ambitious plan with competitive talent along with infrastructure to deliver growth for becoming a global leader in Healthcare employment, tourism, innovation as well as research.

Centennial Hills Hospital

Located in the fast-growing northwest quadrant of Clark County, Centennial Hills Hospital cares for a wide range of medical situations that arise, from accidents at Mount Charleston National Recreation Area to procedures for hearts, spines, and joints.

To accommodate the growing community, the hospital will add a total of 36 inpatient beds through a new fourth-floor expansion project that will increase its total number of inpatient beds to 226. The project is expected to be completed by fourth quarter 2016.

The emergency department often serves as its front door, with more than 51,000 patients seen on an annual basis. Major emergencies, such as strokes and heart attacks, as well as minor emergencies are treated at the facility.

Centennial Hills Hospital features a comprehensive women's center offering care for women at every stage of life. The program also supports alternative delivery models including midwifery. In the last year overall deliveries at the facility exceeded 2,500. Infants who require advanced medical care spend time in the hospital's Level III neonatal intensive care unit (NICU), and "NICU graduates" are celebrated with an annual reunion at the hospital. Digital mammography and advanced diagnostic testing are also available.

For those who need surgery, a da Vinci® robotic surgical system can be used for abdominal, gynecological and urological cases. Centennial Hills Hospital also performs over 2,000 orthopedic surgeries per year. This service line is supported by a nurse navigator on the orthopedic nursing unit and the MAKOplasty® system which uses customized technology for hip replacement and partial knee resurfacing, which is the only system in Southern Nevada.

And, for people who may require therapy after surgery, Centennial Hills Hospital offers an outpatient therapy center to assist with the recovery and rehabilitation. Other outpatient services include a new wound healing and hyperbaric medicine center, which is scheduled to open by the fourth quarter 2016.

Centennial Hills Hospital is a member of The Valley Health System, an integrated system of care comprised of hospitals, physician practices, and outpatient services.

Desert Springs Hospital

Desert Springs Hospital, located just minutes from the famed Las Vegas Strip, McCarran Airport, UNLV, and the Thomas & Mack Arena, is well-equipped to handle the many emergencies of both residents and tourists from around the world.

Many of the services at Desert Springs Hospital focus on some aspect of cardiovascular care. Along with advanced cardiovascular services such as open heart surgery and balloon angioplasty, Desert Springs Hospital features a robotic electrophysiology lab (exclusive in southern Nevada), allowing physicians to fix arrhythmias in a minimally invasive matter. Upon discharge from the hospital, patients may also benefit from the cardiac rehabilitation unit available Monday through Friday.

Other services offered by the hospital also affect the cardiovascular system. The Outpatient Diabetes Treatment Center, which offers classes and counseling in English and Spanish is dually accredited by the American Diabetes Association and the American Association of Diabetes Educators. Meanwhile, the Advanced Outpatient Wound Healing & Hyperbaric Medicine Center, which uses specific techniques, and 100 percent oxygen therapy, respectively, to heal chronic wounds. Desert Springs Hospital is also home to a major weight-loss surgery program, utilizing two Center of Excellence certified surgeons who have performed over 10,000 surgeries, ranging from gastric sleeve to bypass to the new Orbera balloon.

Additionally, the hospital features an inpatient acute rehabilitation unit for patients recovering from a major illness and injury, and a geriatric behavioral health unit for adults 55 and older who need both medical and behavioral assistance.

Desert Springs Hospital is a member of The Valley Health System, an integrated system of care comprised of hospitals, physician practices and outpatient services.

Henderson Hospital

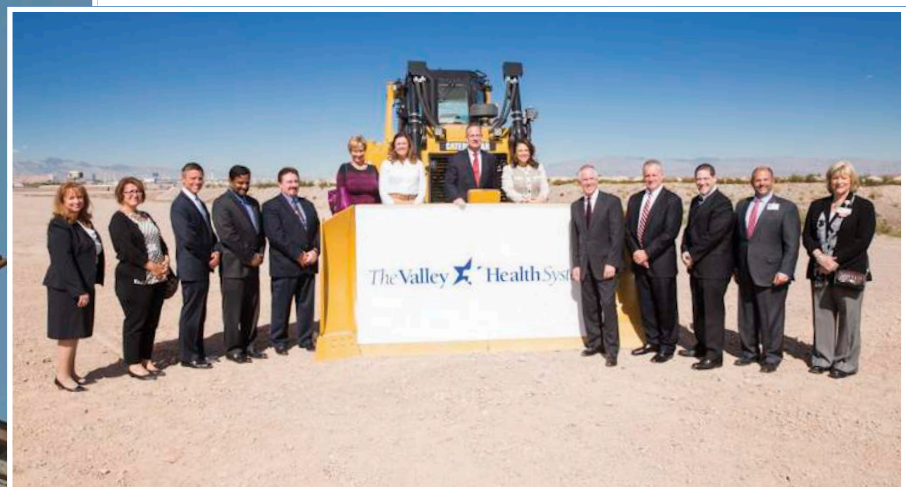

On October 8, 2014, The Valley Health System held a ceremonial groundbreaking between Central Christian Church and Cowabunga Water Park, east of US 95, to celebrate the addition of their sixth hospital. Named after Henderson, Nevada, the community in which it resides, the hospital will open in the fourth quarter of 2016.

As a community hospital, Henderson Hospital will offer emergency and urgent care services, maternity care with a newborn nursery, and a variety of surgical services to serve southeast Las Vegas and the communities of Henderson and Boulder City.

Henderson Hospital is a member of The Valley Health System, an integrated system of care comprised of hospitals, physician practices and outpatient services.

Southern Nevada Full-Service Hospitals

MountainView Hospital

Since 1996, MountainView Hospital has served the northwest Las Vegas Valley with patient-centered care. Established in one of the fastest-growing areas of the valley, MountainView opened with 120 beds. Today MountainView has grown to 340 beds, with future expansions slated to enlarge the hospital to 400 beds. With a dedicated and talented staff of employees and outstanding physicians, MountainView Hospital is recognized for high patient satisfaction and for providing quality and compassionate care to our community for the past two decades.

MountainView features nationally recognized programs including a top cardiovascular and thoracic center, the renowned Las Vegas Institute for Robotic Surgery, an Accredited Chest Pain Center and Certified Stroke Center. Other areas of excellence include emergency care, urology, wound care, obstetrics and gynecological services, orthopedics, vascular care and an inpatient rehabilitation unit.

In its 20th year, MountainView is evolving into a teaching hospital, with the launch of its accredited Graduate Medical Education program, with residencies in the areas of Internal Medicine, General Surgery and Obstetrics and Gynecology. As part of the Graduate Medical Education program, a Clinical Research Department is being established to support the GME programs and bring in the most recent clinical research and evidence-based practices to the Las Vegas community.

AWARDS & ACCREDITATIONS

- › The Joint Commission Accredited Institution
- › Primary Stroke Center - The Joint Commission
- › Society of Chest Pain Centers accreditation
- › American Stroke Association's "Get with the Guidelines" Gold Performance Achievement Award
- › HealthInsight Quality Award for Excellence in Patient Care (2010, 2011, 2012, 2013, 2014)
- › Top Performer on Key Quality Measures™ (The Joint Commission 2010, 2012, 2013)
- › Healthgrades 5-Star Recipient Maternity Care (2013, 2014, 2015)
- › Healthgrades 5-Star Recipient Coronary Artery Bypass Graft (CABG) 2016
- › Designated NICHE hospital

From interventional cardiology and electrophysiology, to open heart surgery and minimally-invasive surgery options, such as TAVR, MountainView is leading the way in providing a full-range of diagnostic and treatment options for all areas of cardiac and cardiovascular care. The hospital is home to MountainView Cardiovascular & Thoracic Surgery Associates, the premier comprehensive cardiovascular and thoracic surgery program in southern Nevada.

MountainView's Las Vegas Institute for Robotic Surgery (LVIRS) is leading the way in the Las Vegas Valley for minimally invasive surgical options for patients. LVIRS offers an extensive panel of surgeons, pairing them with trained staff and nurses, who are part of dedicated robotic teams.

MountainView offers a comprehensive neuroscience program, complete with a Joint Commission Certified Primary Stroke Center and surgical services for a number of conditions that impact the brain and spine.

MountainView is a member of the respected Sunrise Health System comprising of Sunrise Hospital, Sunrise Children's Hospital, Southern Hills Hospital and several surgery, urgent care and diagnostic imaging centers offering a complete range of specialized and technologically advanced services.

- › Stroke Program (Joint Commission Certified Primary Stroke Center)
- › Wound Healing and Hyperbaric Medicine Center

St. Rose Dominican, Rose de Lima Campus

The town of Henderson rose out of a dusty spot of desert in the early 1940s, and its lifeblood was Basic Magnesium Inc., a plant that pulled water and electricity from what was then called Boulder Dam to produce magnesium, a material used for munitions and airplane parts during the war. In 1942, Basic Magnesium Hospital was founded by the U.S. government to provide health care to area industrial workers and their families during the war.

When World War II ended, magnesium production was no longer needed for defense purposes, so many of the 14,000 employees moved away. Basic Magnesium Hospital was put up for sale. The first of the three Dignity Health-St. Rose Dominican hospitals, the Rose de Lima Campus was established in 1947 when the Adrian Dominican Sisters of Adrian, Michigan, purchased Basic Magnesium Hospital from the U.S. government for \$1 a year for 25 years. The hospital was the first in southern Nevada to be accredited by the Joint Commission on Accreditation of Hospitals in 1955 as well as the first in the area to obtain a radioisotope laboratory and the first full accredited cancer treatment center in 1956. It was the first in the state to use a PillCam camera, used to better diagnose diseases in the smaller intestine, in 2002 and the first to be certified by the Undersea and Hyperbaric Medical Society in 2009. A \$25 million, 4-story expansion was completed in 1991 bringing the total square footage to over 220,000 feet housing 119 beds.

AWARDS/CERTIFICATION

- › Healthgrades five-star ratings for hip fracture treatment, esophageal/stomach surgeries, colorectal surgeries and respiratory failure.
- › The Rose de Lima Campus received an A in hospital safety scores from The Leapfrog Group. Additionally, the St. Rose hospital system (Rose de Lima, San Martín and Siena campuses) was the best performing system in southern Nevada. (November 2014)
- › All three campuses were given the Get With The Guidelines Silver Plus Achievement Award by the American Heart Association/American Stroke Association.

PHOTO – In 1947 the facility was named Rose De Lima Hospital and in 1989, in honor of the founding Sisters, the hospital changed its name to St. Rose Dominican Hospital.

St. Rose Dominican, San Martín Campus

The third and youngest hospital in the Dignity Health-St. Rose Dominican system opened its doors to the public in 2006, to serve the ever growing surrounding community. Named after Saint Martín de Porres, a Dominican brother who provided care to the sick and the poor, maintained an animal hospital, established an orphanage and a hospital for poor children. Saint Martín de Porres tradition of making those around him feel comfortable and secure is continued through San Martín campus' beautiful waterfall and Robert Ferre' designed labyrinth featured in the Redina Family Healing Garden.

The following year the St. Martín Campus became the first hospital in Nevada to offer the Allura Xper FD10/10 Cardiac imaging X-ray System. Located on Warm Springs Road in southwest Las Vegas, the hospital has received numerous awards and recognition for its quality care.

AWARDS/CERTIFICATIONS

- › Healthgrades gave the San Martín campus a five-star ratings for pacemaker procedures and pneumonia.
- › The San Martín campus received the American Heart Association's Mission: Lifeline Achievement Award for implementing specific quality improvement measures outlined by the American Heart Association for the treatment of patients who suffer severe heart attacks.
- › All three campuses were given the Get With The Guidelines Silver Plus Achievement Award by the American Heart Association/American Stroke Association. Hospitals receiving this award have reached an aggressive goal of treating stroke patients with 85% or higher compliance to core standard levels of care for 12 consecutive months. In addition, those hospitals have demonstrated 75% compliance to 7 out of 10 stroke quality measures during the 12-month period. (November 2014)
- › The San Martín campus was designated as Baby-Friendly by the World Health Organization (WHO) and the United Nations Children's Fund (UNICEF). (April 2014)

Dignity HealthSM

St. Rose Dominican
San Martín Campus

Location: 8280 West Warm Springs Rd., Las Vegas, NV 89113

President/CEO: Larry Barnard

Opened: 2006; the third of the three Dignity Health-St. Rose Dominican hospitals.

Size: The St. Martín campus has 147 beds on 346,535 square feet.

St. Rose Dominican, Siena Campus

The second campus in the St. Rose Dominican hospital network is named after Saint Catherine of Siena. Having dedicated herself to the care of the unfortunate she eventually became canonized in 1461 and in 1970 bestowed the title of Doctor of the Church making the strides she made in healthcare important to the church in perpetuity.

The Siena campus opened in 2000 with 141 patient rooms. In 2012 Siena campus opened on of the first hybrid operating suites in Nevada, a state of the art all-in-one setting in which diagnosis and treatment can take place. In 2015, the Siena campus opened the five-story, 227,000+ square foot Dominican Tower, nearly tripling the original campus total square footage. The tower cost approximately \$160 million and added another 100 private rooms, bringing the Siena campus to 326 beds in total. The number of private emergency rooms has more than doubled. ER treatment and Rapid Medical Assessment spaces have expanded to over 70 rooms and six new operating suites have been added.

In conjunction with adding space the tower will help streamline the hospital experience. The Cardiology Center was expanded to include its own admitting and waiting areas for noninvasive procedures. Outpatient support services have been expanded greatly, including admitting, nutrition services, radiology lab, pharmacy, and endoscopy suites.

AWARDS/CERTIFICATION

- › Siena campus received five star-ratings for hip fracture treatment and c-section delivery
 - › The Siena campus received the Get With The Guidelines Silver Achievement Award by the American Heart and Stroke Association. Siena is only one of 91 hospitals nationwide to receive the honor.
 - › The Siena campus received the
- the sixth year in a row. This award is given annually by the National Research Corporation to the hospital that consumers rank as best in overall quality, reputation, doctors and nurses.
- › The Siena campus was chosen as a 2013 Top Performer on Key Quality Measures by The Joint Commission. (November 2014)
- The Siena campus received the 2015 Consumer Choice Award for

Southern Hills Hospital

Voted the Best Hospital in Las Vegas, Southern Hills Hospital provides the communities of southwest Las Vegas with emergency and pediatric emergency services, a new behavioral health (geriatric psychiatric) inpatient and outpatient program serving ages 50 and older, an accredited Chest Pain Center, a Certified Primary Stroke Center, a dedicated orthopedic, neurology and spine unit, OB-GYN, diagnostic imaging and surgical services.

Utilizing advanced digital technology and an accomplished medical staff, Southern Hills Hospital's advanced care and superior service make for better outcomes and an exceptional patient experience. The Joint Commission, the leading accreditor of healthcare organizations in America, recognized Southern Hills Hospital as a *Top Performer on Key Quality Measures®* for 2010, 2011, 2012, 2013 and 2014 – the only Nevada hospital to earn this recognition for five consecutive years.

Southern Hills Hospital is a member of the respected Sunrise Health System comprising of Sunrise Hospital, Sunrise Children's Hospital, MountainView Hospital, and several surgery, urgent care and diagnostic imaging centers offering a complete range of specialized and technologically advanced services.

Spring Valley Hospital

Spring Valley Hospital, located in blossoming southwestern Las Vegas, cares for thousands of patients each year. To accommodate the growing needs of the region, a tower will open in the summer of 2016 to provide more private patient rooms. Two more open-heart surgery suites, including one cardiovascular-thoracic hybrid suite, will be available in the fall of 2016.

As a tertiary care facility, Spring Valley Hospital offers advanced medical care in multiple areas. The emergency department uses both chest pain and stroke protocols for the rapid diagnosis, intervention and treatment of these diseases. If necessary, patients can undergo cardiovascular surgery, neurosurgery, or even an interventional procedure to fix brain aneurysms.

With continued growth in its primary service area, the maternity department delivers over 2500 babies each year. Infants who require advanced medical care spend time in the hospital's level three neonatal intensive care unit (NICU), and "NICU graduates" are welcomed back to an annual reunion.

Based upon the age and lifestyle of its residents, a wide range of surgeries are available, including orthopedics, spine, general surgery, and vascular surgery. With its daVinci® robotic surgical system, surgeons use the technology especially for abdominal, gynecological, and urology procedures.

And, when patients need additional expertise to recover from a stroke or other major illness or injury, they can easily transfer to the acute rehabilitation unit on the fourth floor, and, upon discharge, continue with the Outpatient Therapy Center at Spring Valley Hospital. Additionally, a wound healing and hyperbaric center is also available on the hospital's campus to assist patients with chronic and/or non-healing wounds.

Spring Valley Hospital is a member of The Valley Health System, an integrated system care comprised of hospitals, physician practices and outpatient services.

Summerlin Hospital

As the only hospital in the 36-square-mile master-planned community of Summerlin, the facility has continually added medical services to benefit more than 100,000 residents in the community and surrounding areas.

Along with emergency and urgent care, Summerlin Hospital features advanced cardiovascular services, oncology and orthopedic care, a robust surgical services program, and a Children's Medical Center. The latter includes a separate pediatric emergency department, general and intensive care units and outpatient services for diagnostic procedures and physical, occupational and speech therapy.

The Children's Medical Center is a natural complement to the busy maternity department, which delivers nearly 5000 babies each year. A level three neonatal intensive care unit is readily available for high-risk, medically challenged and/or premature babies, and an annual celebration reunites former patients with staff and physicians.

The cardiovascular program features balloon angioplasty, cardiovascular surgery, and heart failure procedures. Patients may continue their recovery through an outpatient cardiac rehabilitation program.

Oncology services, including chemotherapy, are available for both adult and pediatric patients, with adults staying within a specialized nursing unit dedicated to cancer patients. Several cancer support groups are hosted at the hospital as well.

Patients also benefit from three da Vinci® robotic surgical systems, which can be used for a myriad of procedures, including gynecological, obstetrical, urological, colorectal and abdominal procedures. Summerlin Hospital also performs a number of orthopedic procedures, offering pre-surgical education, a nurse navigator on the orthopedic nursing unit, and options for either inpatient rehabilitation or outpatient physical and occupational therapy.

Summerlin Hospital is a member of The Valley Health System, an integrated system of care comprised of hospitals, physician practices and outpatient services.

Sunrise Hospital & Medical Center and Sunrise Children's Hospital

Sunrise Hospital & Medical Center and Sunrise Children's Hospital offers high quality, patient-centered healthcare to the residents of southern Nevada, its surrounding region, and the millions of visitors that come to Las Vegas. As a 16-time Consumer Choice award-winning hospital and two-time "Best Hospital in Las Vegas", Sunrise Hospital is the region's healthcare leader.

Sunrise Hospital serves as Nevada's largest acute care facility and Level II Trauma Center which is located just minutes away from the Las Vegas Strip. On the same campus is Sunrise Children's Hospital, Nevada's largest, most comprehensive children's hospital. Together, both facilities offer a full range of services for both children and adults.

The Heart Center at Sunrise offers the most advanced cardiac care and features an Accredited Chest Pain Center. The Nevada Neurosciences Institute – the region's most comprehensive Joint Commission Certified Primary Stroke Center – provides world-class care for stroke, epilepsy, multiple sclerosis, and other neurological conditions.

We offer Nevada's only pediatric open heart program and the state's largest Level III Neonatal Intensive Care Unit (NICU) and Pediatric Intensive Care Unit (PICU). The Breast Center at Sunrise Hospital is the only Accredited Breast Center in Southern Nevada. We also feature a Certified Cancer Center, a dedicated Pediatric Emergency Department, southern Nevada's first Triple Joint Commission Certified Program for Total Hip Replacement, Total Knee Replacement, and Spine Surgery, southern Nevada's only Accredited Inpatient Rehabilitation Unit, 24/7 in-house Pediatric Intensivists and Obstetricians, Robotic-Assisted Surgery, and Nevada's only Gamma Knife Center.

Sunrise Hospital and Sunrise Children's Hospital are members of the respected Sunrise Health System comprising MountainView Hospital, Southern Hills Hospital and several surgery, urgent care and diagnostic imaging centers offering a complete range of specialized and technologically advanced services.

- › Pediatric Admissions: More than 2,300
- › Surgeries: Approximately 15,600
- › Births: More than 3,000

University Medical Center

UMC offers the highest level of care in Nevada, providing a wide range of exclusive and specialized health care services to community members and visitors. UMC is home to Nevada's only Level I Trauma Center, only Designated Pediatric Trauma Center, only Burn Care Center and only Center for Transplantation. Children's Hospital of Nevada at UMC serves as the state's only hospital to be recognized and accepted as an associate member of the Children's Hospital Association.

Offering highly skilled physicians, nurses and staff members supported by the latest, cutting-edge technology, UMC and Children's Hospital of Nevada at UMC continue to build upon their shared reputation for providing Nevada's highest level of care.

In support of its mission to serve as the premier academic health center, UMC is the anchor partner for the new UNLV School of Medicine.

UMC provides community members with access to the most advanced surgical technology in the state, in addition to one of Nevada's most highly awarded cardiology and stroke programs.

UMC's health care system also includes six Primary Care and seven Quick Care locations throughout the Las Vegas Valley, providing convenient, accessible health care to community members. To further support the health of southern Nevada, the hospital recently launched the Healthy Living Institute at UMC, providing complimentary classes focused on integrative healing practices and evidence-based health care.

As a result of UMC's steadfast commitment to providing Nevada's highest level of care, the hospital has earned numerous awards and accreditations. UMC recently became the first hospital in Nevada to receive the most advanced level of Chest Pain Center Accreditation from the Society of Cardiovascular Patient Care. This accreditation as a Chest Pain Center with Primary PCI and Resuscitation recognizes UMC's high level of expertise in quickly assessing, diagnosing and treating patients who exhibit symptoms of a heart attack.

In addition, UMC is the only hospital in Nevada to be accredited by the Commission on Cancer for offering an Academic Comprehensive Cancer Program. UMC has received Hospital Accreditation from The Joint Commission, and the hospital's Stroke Center has attained advanced certification for Primary Stroke Centers. In addition, UMC's nationally recognized, state-of-the-art laboratory was named 2015 Lab of the Year – First Runner Up by Medical Laboratory Observer.

PHOTO – UMC's expertly trained team members are committed to providing patients with the highest level of care in Nevada.

Valley Hospital

Since 1971, the health care professionals of Valley Hospital have prided themselves on providing excellent patient to their patients. Located in the heart of the Las Vegas Medical District (LVMD) near the government centers and The Smith Center for Performing Arts, it is the founding hospital of The Valley Health System.

As an advanced teaching hospital, Valley Hospital has more than 80 physician residents and fellows working directly with patients. Under the direction of experienced faculty members, these physicians provide intensified patient care using evidence-based medicine and following clinical pathways that research has shown to be effective with most patients.

As a tertiary care facility, Valley Hospital provides advanced cardiovascular, interventional neurological and neurosurgical services. Physicians began performing open heart surgery in the late 1970s. The hospital's continued emphasis on cardiovascular care continues with interventional cardiac procedures including balloon angioplasty, vascular procedures, and heart pumps to improve patients' outcomes.

Meanwhile, neurosurgeons perform complex endovascular and spine surgeries, while interventional radiologists carry out intricate neurological procedures in the biplane angiography lab. Patients who are recovering from a stroke or other major injury or surgery can transfer to the acute rehabilitation unit on the fourth floor for more intensive therapy to aid in their recovery.

A wide range of surgical procedures are also performed at the hospital, with patients benefitting from da Vinci® XI robotic surgery technology used especially for abdominal, colorectal, gynecological and urological surgery. Those requiring inpatient care are directed to one of several nursing units, tailored to their particular post-surgical needs.

As part of the continuum of care, patients and community members can utilize the Diabetes Treatment Center for education and counseling, and the Wound Healing & Hyperbaric Medicine Center for chronic and hard-to-heal wounds.

Valley Hospital is a member of The Valley Health System, an integrated system of care comprised of hospitals, physician practices, and outpatient services.
